It is Applicant's Intention that such an interview will lead to an agreeable resolution of the rejected claims.

Applicant would appreciate the opportunity to discuss rejections with respect to claim 1 and the differences that exist between the subject application as set forth in claim 1 and the teachings of Rosenberg et al. (U.S. Publication No. 2004/0075676; hereinafter "Rosenberg") in view of Whitcomb (U.S. Publication No. 2002/0154095).

LIST OF CLAIMS

1. (previously presented): A mobile terminal comprising:
- cursor display means for controlling a display position of a cursor to be displayed on a display in response to user's operation on a pointing device; and
- notification control means for determining a relative positional relationship between the display position of the cursor and the display position of an object selectable by a user and notifying, when it is determined that the display position of the cursor locates within a range of predetermined distance from the display position of the object, the user of the positional relationship by means of at least one of modes including: sound output; and vibration generation and light emission.
14. (new): The mobile terminal according to claim 1, wherein the user is notified immediately upon determining that the display position of the cursor locates within a range of predetermined distance from the display position of the object.
